Skills

CODING LANGUAGES

Javascript ES6
HTML5
CSS3
Ruby

LIBRARIES AND FRAMEWORKS

ReactJS
Express
Node
Rails
Sinatra

DATABASES

SQLite
PostgreSQL

TESTING

Jest
React Testing Library
RSpec

TOOLS

Git
GitHub
Heroku
Netlify

CODING SKILLS

Object Oriented Programming
Test Driven Development
Pair Programming

Projects

Build My App

An application that connects web and mobile developers with regular people who have project ideas. A developer can go through a list of projects to see what interests them and propose a plan to the project owner. The project owner can accept one plan for the project idea.

Deployed: <https://build-my-app-fe.onrender.com/>

Team Project: I have been all over the codebase on this project, same as my teammates. I did some heavier lifting in matching design documents from our UX Designer using Material UI and React Styled Components. I also did my fair share of creating endpoints and setting up the front end for those end points with conditional rendering based on a user's role.

Featured Technologies: Node, React, React Hooks, JSon Web Tokens, Auth0, NodeMailer

Github: github.com/labs13-build-my-app/frontend
github.com/labs13-build-my-app/backend

App Marketing Page

A static website to promote an app. I don't consider myself a designer so I am proud to have made something that looks nice and is functional.

Deployed: use-my-tools-marketing.netlify.com

Solo Project

Featured Technologies: HTML, CSS w/ LESS, Javascript, Bootstrap, FontAwesome

GitHub: github.com/usemytools3-11/UserInterface

Education

Lambda School

Certificate of Completion Web Development and Computer Science

Apr. 2019 to Current

Dev Bootcamp

Certificate of Completion Web Development

May 2017 to Aug. 2017

Employment

Lambda School

Team Lead

- Mentor assigned group of full stack web developer students
- Lead assignment walkthroughs for full cohort of web students
- Hold open door office hours to answer student's questions

Remote
May 2019 to Current

DoorDash

Driver

- Use app to schedule pickup and deliveries
- Manage multiple pickup and deliveries simultaneously with help of app

Northern California
Nov. 2018 to Current

Firestone Complete Auto Care

Lead Technician

- Trained new technicians in maintenance and repair practices
- Managed individual workflow to meet customer promised times

Brentwood, CA
Nov. 2017 to Sept. 2018

Roesbery Car Care

Service Manager

- Managed all technicians and office staff, including time off, production, and assignments
- Sold recommended and suggested work to vehicle owners
- Operated shop safety as per OSHA standards
- Stocked supplies and needed parts
