## » SKILLS

### CODING LANGUAGES

Javascript ES5/ES6  
HTML5 and CSS3  
Ruby  
Python

### LIBRARIES AND FRAMEWORKS

ReactJS  
Node  
Express  
Rails  
Sinatra  
LESS/SASS

### DATABASES

SQLite  
PostgreSQL

### TESTING

Jest  
React Testing Library  
RSpec

### VERSION CONTROL

Git  
GitHub  
Heroku  
Netlify  
Render  
Vim  
VS Code  
Sublime  
Mac OS  
Terminal

### SOFTWARE DEVELOPMENT

Object Oriented Programming  
Test Driven Development  
Pair Programming  
AGILE Development

## » EDUCATION

**Lambda School** Apr. 2019 to Current  
Web Development and Computer Science

**Dev Bootcamp** May 2017 to Aug. 2017  
Web Development

## » CODING PROJECTS

### App Marketing Page

HTML | CSS w/ LESS | Javascript | Bootstrap | FontAwesome - <https://use-my-tools-marketing.netlify.com>  
A static website to promote an application including a page of the developer profiles.

Solo Project:

- Designed UI including choosing color scheme
- Implemented image carousel using bootstrap
- Used vanilla Javascript to expand cards on team page in mobile view
- Made both pages fully responsive based on screen size

### Build My App

Node | React | React Hooks | Axios | JSon Web Tokens | Auth0 | NodeMailer - <https://build-my-app-fe.onrender.com>

An application that connects web and mobile developers with regular people who have project ideas so that the project owner can recruit a developer to work with.

Team Project:

- Matched design documents from our UX Designer using Material UI and React Styled Components
- Created multiple endpoints in Node including router and model setups
- Used Axios in React application to retrieve data from Node application

### Disneyland Utility App

Node | React Native | Axios | Firebase AuthO | Twilio | Node-Cron

An application that users can sign up for text notifications when the status of ride changes from "temporarily down" to "active".

Solo Project:

- Update a database using a Cron to retrieve information from an API
- Make a sortable and filterable table of data
- Send text notification on data change

## » MOCK INTERVIEW FEEDBACK

### React Interview

"Joseph did a great job overall especially on his React fundamentals where he breezed through the Counter problem and had great knowledge of hooks." - Justin Chen, Airbnb Senior Software Engineer

Full Feedback: <https://www.skilledinc.com/report-card/2217>

### Ruby Interview

"Joseph had a very pragmatic approach to solving the coding challenge I presented him with. He followed standard OO coding conventions and showed he had a great grasp of Ruby fundamentals." - Elliot Carlson, Lyft Engineering Manager

Full Feedback: <https://www.skilledinc.com/report-card/290>

### Ruby Interview

"Joseph had a very good interview, he was able to answer the questions about Ruby and basic Computer Science, just with some minor stumbles. I noticed since the begin of the interview that his Ruby knowledge is very good, so we focused on algorithm/problem solving question, that of the interview was also very good" - Antonio Tari, Snapchat Inc., Android Team Leader, Senior Software Engineer

Full Feedback: <https://www.skilledinc.com/report-card/382>

## » WORK HISTORY

### Lambda School

*Team Lead*

Remote  
May 2019 to Current

- Mentor assigned group of eight or more full stack web development students
- Lead assignment walkthroughs for full cohort of forty or more web development students
- Hold open door office hours for the duration of class time to answer any student's question

### Firestone Complete Auto Care

*Lead Technician*

Brentwood, CA  
Aug. 2017 to Apr. 2018

- Trained three new technicians, one at a time, on the job in maintenance and repair practices
