RESTful APIs

» CODING PROJECTS

App Marketing Page - https://use-my-tools-marketing.netlify.com
HTML | CSS w/ LESS | Javascript | Bootstrap | FontAwesome
A static website to promote an application including a page of the developer profiles.
Solo Project:
- Designed UI including choosing color scheme
- Implemented image carousel using bootstrap
- Used vanilla Javascript to expand cards on team page in mobile view
- Made both pages fully responsive based on screen size

Build My App - https://build-my-app-fe.onrender.com
Node | React | React Hooks | Axios | JSon Web Tokens | Auth0 | NodeMailer
An application that connects web and mobile developers with regular people who have project ideas so that the project owner can recruit a developer to work with.
Team Project:
- Matched design documents from our UX Designer using Material UI and React Styled Components
- Created multiple endpoints in Node including router and model setups
- Used Axios in React application to retrieve data from Node application

Disneyland Utility App
Node | React Native | Axios | Firebase AuthO | Twilio | Node-Cron
An application that users can sign up for text notifications when the status of ride changes from "temporarily down" to "active".
Solo Project:
- Update a database using a Cron to retrieve information from an API
- Make a sortable and filterable table of data
- Send text notification on data change
